

**ALGEBRA 2  
SUMMER WORK**

YOUR NAME: \_\_\_\_\_

**Directions:** The concepts covered in this packet are skills that students should have mastered in Algebra 1. If you are drawing a blank, please refer to the problems that have already been completed for you.

**Rationale:** The math course you are starting on August 16<sup>th</sup> has some high expectations. Therefore, we are asking for you to work on the skills in this packet to be better prepared for this course. The skills include:

- (1) follow order of operations appropriately in all situations
- (2) add, subtract, & multiply polynomials
- (3) solve a variety of linear equations

To refresh on these topics, you'll need to practice these skills in the weeks leading up to the beginning of the 2017 - 2018 school year.

**Resources:** For each even numbered problem you need to complete, there is an odd-numbered example problem worked out in detail. If that's not enough to guide your work, then we suggest you google the topic you are struggling with or go to one of the following websites & search the topic...

*This packet will count as a grade, so please take the time to complete these problems.*

**(OVER)**

A requirement of this course is that you purchase a graphing calculator. Although these can be expensive, we will use it in every unit to supplement the content that is being learned. Below are *suggested* calculators that are appropriate to use in Algebra 2 and can be used in subsequent years through college level math courses.

TI - 83+

If you purchase a TI - 83, it needs to be a plus (+) model. You will need the blue/purple “APPS” key.

This is the button we are looking for.

TI - 84/TI - 84+

These calculators come in various models, as they have been updated over the years. ANY TI - 84 is appropriate. It can be a plus (+) model, a C or CE model or a silver edition model. It can also have a black and white screen or a color screen. The most efficient calculators are the newest thinner calculators with a color screen.

It is highly recommended to purchase one of these calculators as soon as possible, as they do sell out quickly at the beginning of the school year.

Thank you,
