Sequence

Computer Science
AP Computer Science

Semester 1

During the first semester you will learn how to read and write in the Visual Basic Programming Language. You will design multiple programs that demonstrate your mastery of Visual Basic. The class will be made up of a mixture of instruction and individual programming. Some project can also be completed in groups. Ideas such as if statements, loops, string manipulation, loops, random number generators, etc. will be addressed.

Semester 2

The second semester will start with a continuation of Visual Basic where you can experiment with design your very own program as well as projects dealing with game shows and board games.

Examples of Some Programs You Get to Make
