Dear Scott Helton,

I hope you are off to a great start of the school year. I want to take a couple minutes of your time to thank you for your support and the investment your school district has made in data analytics. Without your leadership and commitment to data-informed decision making, Forecast5 would not be able to grow and continue to evolve the analytics program.

As a company that thrives on innovation and growth, we are energized by our clients that take our tools, apply their creativity and domain expertise, and generate value for their organizations. The work that Adam Cibulka did relating to High School Readiness and College & Career Readiness was exemplary – and we believe it deserves national recognition.

Your district has been selected as a winner of one of our Projects of the Year for 2018. Your Forecast5 relationship manager, Jason Schoenleber, nominated your district for the work that Adam performed in 5Lab in 2018.

This award will be recognized during a presentation on the Friday of our National Conference (October 12, 2018). We hope that this recognition inspires further innovation at your district, as well as creates opportunities for other school systems to leverage your ideas for the benefit of students across the country.

Forecast5 is excited about any use of analytics that saves money, creates efficiency, or improves opportunities and outcomes for students and communities. I hope that you will accept this \$750 donation to benefit your student scholarship fund or to create a professional development opportunity for your staff.

Again, thank you for your vision and continued support. It is an honor for us to be able to serve DuPage HSD 88.

Best regards,

Mike English
CEO/President
