

# *Other considerations for “in-person” instruction*

- Planning for in-person contact will be based on the guidance from the Center for Disease Control, Illinois Department of Public Health, and the DuPage County Health Department. Full CDC school guidance can be accessed [HERE](#).
- Staff who have not been designated as essential employees should seek approval from the department head and principal to work on campus each day detailing areas to be accessed. The District may implement an electronic symptom screening and approval process. *Symptom screening application instructions can be accessed using this LINK*
- Student supervisors will be asked to perform temperature checks for students at all entry points to the building and on school buses pursuant to final ISBE and IDPH Phase 4 guidance. Staff are expected to check temperatures at home before coming to work. Students or staff with temperatures of higher than 100.4 degrees will not be permitted in the building. Students will be symptom screened upon entry to the schools. Students on campus presenting with a fever will be isolated in the secondary nurse’s office and sent home. As a reminder, staff experiencing symptoms should not report to work.

# *Other considerations for “in-person” instruction*

- Handwashing stations or sanitizer will be available at all entry points to the building (as well as in each classroom) and students without masks will be provided masks. Sharing supplies, tools, materials, etc. should be avoided entirely both in classrooms and in office spaces.
- Students or staff reporting a positive COVID-19 test will be directed to quarantine for ten (10) days or until he/she presents two negative tests. Return to school/work guidance can be found [HERE](#).
- In addition, in order to fulfill our obligation related to contact tracing, the student or staff member will be asked to provide a list of any person with whom he/she had contact for fifteen (15) minutes or more at a distance of six (6) feet or less proximity since three (3) days prior to symptoms presenting. The student or staff member will also be asked to provide a list of any area he/she accessed in the district. This information can be provided using this [FORM](#).
