2023-2024

The 21st Century Vision for DuPage District 88

VISION: The successful vision for DuPage District 88 is one of a desired, hopeful future to chart its path of action. It is intended to be a source of pride, to instill the courage to make thoughtful and responsible decisions, and to be a compass for the future.

The 21st Century for DuPage District 88 is one of a learning community that welcomes, excites, and challenges. This envisioned future is described by:

Schools that...

- are safe and modernized promoting a learning environment that is healthy and conducive to optimal learning
- are structured as engaging and small learning communities that value and embrace diversity and allow for personalized and collaborative learning
- maximize a variety of learning spaces and arrangements that accommodate and sustain rigorous, creative, and innovative 21st Century learning
- form a tightly-connected and highly-interactive Addison Trail - Willowbrook (district-wide) learning community
- are part of a collaborative network of schools that represent an expanded global learning community

Classrooms that...

- are inspiring, caring, respectful, and empowering for all students
- emphasize robust, experiential, personalized and collaborative learning focused on real-world (local and global) issues and challenges
- have accessible digital tools that are used for the acquisition of 21st Century knowledge and skills

Learning Programs that...

- rigorously and dynamically integrate core knowledge instruction with 21st Century literacy skills*
- maintain high local and global standards and enable students to develop intellectual and life skills through critical thinking and applied learning in all programs of study
- are interdisciplinary, project-based, career-connected, and linked with elementary, middle level, and higher education programs
- forge partnerships with business/community sectors, develop mentoring-tutoring relationships, and provide local/global service learning opportunities
- provide opportunities for diverse learners to thrive in an environment of inclusion and acceptance

Learners who...

- are respectful, self-directed, enthusiastic, positive, and responsible
- are critical, creative thinkers prepared to use 21st Century learning tools in responsible ways that contribute to the good of our global society
- are proactive, productive and ethically-appropriate consumers and contributors to the local and global community
- are engaged, resilient, and view 21st Century change as opportunities for growth and development

Teachers and professionals who...

- continuously connect existing content, skills, and assessment practices with vigorous intellectual, creative, and forward thinking associated with 21st Century essential educational changes
- are caring, respectful, and adaptable in meeting the needs of all learners
- are highly qualified and collaborative team players

School-Community partnerships that...

- embrace its youth by providing a healthy, safe, and nurturing school-community environment
- share the responsibility for providing appropriate and inclusive learning and recreational opportunities for youth before/during/after school hours

GENERAL INFORMATION

This guide lists courses offered in DuPage High School District 88. District-wide offerings (both Addison Trail and Willowbrook) are listed first, followed by courses specific to each school. Please read this guide carefully and discuss your course selection with your parents, teachers and counselor. Some courses may be canceled due to insufficient enrollments. If this happens, your counselor or the summer counselor will help you select another course.

CREDIT:

1. A full-year course, such as Biology, Algebra 9, etc., receives two credits per year, one each semester.
2. A semester course, such as Business Law, Public Speaking and Communication, Health, receives one credit.
3. Physical Education receives one credit per semester.
4. Credits may be made up through summer school, county continuing education, or College of DuPage; however, courses from these alternatives must be pre-approved by your counselor.

REQUIRED COURSES:

English

Every student must take and pass 8 semesters of English, including English 9, 10, 11, and Public Speaking and Communication.

Public Speaking and Communication

Every student must take and pass one semester of Public Speaking and Communication or Public Speaking/Technology, which may be used to meet the English requirement.

Mathematics

All students are required to take and pass three years of mathematics. All students must take one year of math that includes algebraic thinking and one year of math that includes geometric thinking.

Science

Every student must successfully complete three years of science: 1 year of biological science and 1 year of physical science. In their third year, students will have the opportunity to take any of the other Science courses to satisfy the requirement. Additionally, students will have the option to substitute the 3rd year of science with administrative approval for one of the following capstone career pathways:

- Culinary Arts 3
- Education Teacher Preparation (Ed Pathway)
- Auto 3, Auto 4, Auto 5, Auto 6
- Manufacturing Apprenticeship
- PLTW Digital Electronics
- Vocational TCD programs

Counselors will help choose science course(s) based on science background, vocational/career objectives, and the recommendation of the Science Department.

Social Studies

Every student is required to successfully complete one year of U.S. History, one semester of Government (which includes civic education), one semester Economics, and one year of Human Geography or AP Human Geography. The United States and Illinois Constitution exams, which are given in the U.S. Government classes, must be passed in order for a student to graduate. Students are required to take three consecutive years of Social Studies, beginning with Human Geography or AP Human Geography in Grade 9 and continuing in Grades 10 and 11.

General Education Requirements

Beginning with the Class of 2019, the general education requirements are:

3 semesters in Art, CTE (Business, Industry & Technology, or Family and Consumer Sciences), Music and World Language

**** Note: The Consumer Education course requirement does not meet the CTE general education requirement.**

Physical Education

Illinois School Code requires daily physical education for all students. All District 88 students will be scheduled into a PE class every semester. Health and Driver's Ed count as PE classes under the School Code. PE classes carry full credit, grade point average, and rank. Students can count PE credits towards elective credit for graduation. However, a student in grades 9-12, may submit a written request for administrative approval to be excused from physical education courses for the reasons stated below.

- Enrollment in academic classes that are required for admission to an institution of higher learning (student must be in the 11th or 12th grade and enrolled in an 8 period day); or
- Enrollment in academic classes that are required for graduation from high school, provided that failure to take such classes will result in the student being unable to graduate (student must be in the 11th or 12th grade and enrolled in an 8 period day or alternative program).

A student who is eligible for special education may be excused from physical education courses pursuant to 7:260, Exemption from Physical Education.

- He or she (a) is in grades 9-12, (b) his or her IEP requires that special education support and services be provided during physical education time, and (c) the parent/guardian agrees or the IEP team makes the determination; or
- He or she (a) has an IEP, (b) is participating in an adaptive athletic program outside of the school setting, and (c) the parent/guardian documents the student's participation as required by the Superintendent or designee.

Reading

The requirement for Reading is one semester unless exempt. Students will take a reading test when they enter Addison Trail or Willowbrook prior to their placement in courses. District 88 establishes cut scores on the Reading Placement exam; based on these cut scores, some students may be placed into a reading intervention, which may include a separate course. The Reading course exit criteria include performance on common assessments, teacher recommendations, and grades in content area classes, in addition to scores on the schoolwide Reading assessments. Students will not be required to remain in the program beyond two (2) semesters.

Consumer Education

The Consumer Education requirement may be met through one of the following options: Consumer Management, Online Consumer Management, Introduction to Business or Sheltered Consumer Management.

REQUIRED PERFORMANCES: Constitution test and Health proficiency

Educational Plan: An educational plan will be required for all students. A counselor will meet with each student to prepare a realistic plan based: on the student and parent's educational and vocational goals.

Transportation: Students who elect to take a course at the Technology Center of DuPage will have transportation provided by the district. Students who elect Invitation to Teaching or Medical Careers will need to provide their own transportation.

Credits/year

Students in District 88 are evaluated for year in school based upon the number of credits they have earned*.

Grade 9	0	to	10	credits and year 1
Grade 10	11	to	21	credits and year 2 or higher
Grade 11	22	to	32	credits and year 3 or higher
Grade 12	year 4 or higher and completion of required state assessments (if applicable)			

*The evaluation of credits for determining year in school will take place three times a year in August, January, and June.

REGISTRATION FOR SCHOOL

Every August a registration packet is sent to each home with the necessary registration information and dates and times for students to register by class. Students are expected to register on the date that is designated for their class. When an extenuating circumstance occurs, and a student cannot register on the assigned date, the guidance office needs to be notified.

District 88 Graduation Requirement Summary	
English	8 semesters (includes a semester of Public Speaking and Communication/Public Speaking & Communication Technology) (English 9,10 & 11) (1 additional semester)
Mathematics	6 semesters (2 semesters algebraic thinking) (2 semesters geometric thinking) (2 additional semesters)
Science	6 semesters (2 semesters biological science) (2 semesters physical science) (2 additional semesters)
Social Studies	6 semesters 2 semesters of Human Geography or AP Human Geography 2 semesters American History 2 semesters Social Studies (Economics, Government) *Beginning with Class of 2020 - Students are required to take three consecutive years of Social Studies, beginning with Human Geography or AP Human Geography in Grade 9 and continuing in Grades 10 and 11.
Reading	1 semester – unless exempt. Based on proficiency, a student may need additional reading courses. 2 semesters of enrollment maximum
General Education	3 semesters Art, CTE * Career and Technical Education (Business, Industry & Technology and Family and Consumer Sciences), Music or World Language
Consumer Education	1 semester
Elective Credits **All students are required to take 8 semesters of Physical Education per Illinois School Code. The PE credits will allow students to complete 8 of the 13 elective credits necessary for graduation.	13.0
Total Credits	44.0
Performance Requirements	Constitution Test
	Health Proficiency Requirement – must pass a Health class

FUTURE PLANS

College Planning:

College and university entrance is primarily based on the results of an entrance exam, the student's grade point average, class rank and the student's high school courses. These requirements vary from school to school and are even somewhat flexible within a school. Please check with your counselor or the college you are considering for specific information. **Students should confirm with their counselor that they are taking college accepted courses in the required areas since some courses will not meet the entrance requirements of some universities.**

Trade, Industry and Vocational Planning:

Students wishing to pursue a specific trade or vocation are encouraged to examine and pursue Career and Technical Education sequences. Please see your guidance counselor for more information.

Career Planning:

See your counselor for help in exploring your career options, making some initial decisions, and developing a plan for reaching your educational and career goals.

Illinois Seal of Biliteracy and Commendation:

DuPage High School District 88 students have the opportunity to earn the Illinois Seal of Biliteracy and/or Commendation.

According to the Illinois State Board of Education (ISBE):

"The Illinois Seal of Biliteracy is a recognition given to graduating high school students who have demonstrated a high level of proficiency in English and in reading, writing, listening and speaking in another language. The State Commendation toward Biliteracy is a recognition given to graduating high school students who have demonstrated significant progress toward achieving a high level of proficiency in English and in reading, writing, listening and speaking in another language."

Once earned, the student's diploma (upon graduation) will contain the official ISBE Seal or Commendation symbol. In addition, the Seal or Commendation will be added to the student's transcript upon verification that the district determines the student has met the necessary performance criteria during the student's enrollment in high school.

GRADE WEIGHTING SYSTEM AND HONOR ROLLS

The course as well as the grade earned determines how many honor points a student receives toward class rank. Class rank is used primarily for college admission. Students will be able to earn an A, B, C, D, or F in all classes. Students who take more challenging courses are able to earn additional honor points. Thus, a student who enrolls in four high weighted courses and receives one A, two B's and one C at the end of the semester will have a 4.00 grade point average, whereas another student with the same grades, but is in all regular courses, would have a 3.00 grade point average. This would give the student in the high weighted courses a higher class rank and a better chance for college admission. High weighted courses are identified within the course outlines.

	A	B	C	D	F
High weighted courses	5 pts	4 pts	3 pts	2 pts	0 pts
Regular weighted courses	4 pts	3 pts	2 pts	1 pt	0 pts

Students must be enrolled in a minimum of four academic courses to be considered for the honor roll. The Distinction Honor Roll requires a grade point average of at least 3.5 for the marking period and all grades must be an A or B. The Merit Honor Roll requires an average of 3.0 to 3.49. No student with the grade of I is given honor roll status until the work is completed. Sophomores, juniors and seniors may be elected to the National Honor Society on the basis of scholarship, leadership, service and character. The entire faculty is involved in the selection process.

All students must be enrolled in a minimum of four classes to be considered for the honor roll.

IHSA ELIGIBILITY

To be eligible to represent the school in interscholastic contests, students must be passing 5 academic classes per week during the season and must have passed 5 academic classes the semester prior to participation. Passing work shall be defined as work of such a grade that if on any given date a student would transfer to another school, passing grades for the course would immediately be certified on the student's transcript.

Any student who fails to meet the academic criteria stated above will be ineligible for interscholastic competition for the following week beginning Monday through Saturday of that week.

Any student ruled ineligible for not meeting the academic criteria stated must be passing 5 academic classes at the end of the ineligible week or the ineligibility will continue for another week. Students suspended or expelled from the high school educational program are not permitted to participate in or attend any school curricular or co-curricular events or activities during the term of the 37 suspension/expulsion. Any student placed off campus in an alternative program/outside placement facility will be considered by the administration for participation in extracurricular activities on an individual, case by case basis.

1. To participate in Illinois High School Association activities such as athletics, music, drama, speech, cheerleading, debate, math team, or academic team, a student:
 - A. Must be enrolled in and pass five academic classes each week to be eligible.
 - B. Must pass five academic classes each semester.
 - C. Must have parental consent, training rules, current physical.
 - D. See IHSA Athletic Eligibility Rules at <http://ihsa.org/AbouttheIHSA/ConstitutionBylawsPolicies.aspx>.
2. Students are subject to the Code of Conduct and school disciplinary rules.

TEACHER QUALIFICATIONS

In accordance with ESEA Section 1111(h)(6) *PARENTS RIGHT-TO-KNOW*, DuPage High School District 88 will provide the parents, upon request, (and in a timely manner), information regarding the professional qualifications of the student's classroom teachers, including, at a minimum, the following:

1. Whether the teacher has met State qualification and licensing criteria for the grade levels and subject areas in which the teacher provides instruction.
2. Whether the teacher is teaching under emergency or other provisional status through which State qualification or licensing criteria have been waived.
3. The baccalaureate degree major of the teacher and any other graduate certification or degree held by the teacher, and the field of discipline of the certification or degree.
4. Whether the child is provided services by paraprofessionals and, if so, their qualifications.

For additional information, please contact Mr. Michael Bolden, Asst. Superintendent for HR at (630) 530-3985.

LEARNING SERVICES (SPECIAL EDUCATION)

District 88 Learning Services Department

Programming and Services for Students with IEPs in District 88

Case Management: All students with IEPs receive direct case management services from a certified special educator Tuesday to Friday during Warrior/Addison Trail Resource Time. This designated 35 minutes daily is for your student's case manager to monitor their progress and demonstrate skill in all of their classes. The case manager is your and your student's "go-to" adult in the building. The case manager will also be at your student's annual review each year and provide you with nine-week goal updates throughout the year. Each year the case manager will contact you to introduce themselves and provide you with their contact information. The programs below illustrate the level of service within the classes your student will receive which are determined at their annual review.

General Education with Consult Support: Students who are enrolled in all general education courses and also have IEPs will have access to their case manager on a consult basis. As deemed appropriate by the IEP team, students receiving services in this manner will be in their case manager's Warrior Time Resource (Tuesday through Friday, 9:25-10:00 AM at Willowbrook) or ATR (Tuesday - Friday, 10:15 - 10:55 AM at Addison Trail) . During this time, the case manager will meet with students to ensure that IEP accommodations and support are being met, monitor student progress, and help develop post-high school transition plans related to areas of strength and interest.

General Education with Co-Taught Support: Co-taught courses provide students with access to general education curriculum with additional support. This model allows for students to have access to seamless integration of supports, interventions, modifications, and accommodations in order to meet the unique needs of all learners.

Bridge(s) Program: The Bridge Program adapts core curriculum and standards to meet the individual learning needs of students. The program offers a low student-to-teacher ratio, including a paraprofessional to provide individualized instruction to no more than 13 students in each class period. Consistent research-based assessment is provided to monitor student growth and achievement frequently.

Courses offered in the Bridge Program:

- English 9, 10, 11, 12
- Pre-Algebra, Algebra, Geometry, Algebra 2, Consumer Math (Addison Trail only), Career Based Math
- Human Geography, US History, Government (semester), Economics (semester)
- Biology, Chemistry, Geoscience
- Consumer Management (semester - Willowbrook only)
- Health (one semester)
- From School to Work
- Driver's Education (Addison Trail only)

Self-Contained Programs in District 88

Strive Program Willowbrook only: The Strive Program ensures a focus on educational success, self-awareness, and community development. It is through this program that all components of the student's life are brought together to achieve the goals that have been set. Lifelong learning is promoted in the areas of academics, careers, community, and most importantly, self.

Students are encouraged to take responsibility for their behavior and academic progress. Strive offers a safe and structured environment to promote student learning. Not all students learn in the same manner, therefore, Strive will provide a variety of instructional approaches to support their learning. Each student is a valued individual with unique academic, social, and emotional needs. The Strive staff will help students learn how to make appropriate decisions in a

supportive and challenging environment. A commitment to continuous improvement is essential for Strive to succeed. Parent/guardian support is important to the success of our students.

As part of the program, students receive art therapy, music therapy, and pet therapy; in addition, those eligible for IEP social work support get their needs met through the program.

Perseverance and Resilience Education Program (PREP) Willowbrook only: The goal of the Perseverance and Resilience Education Program is to provide support to students to strengthen their academic and social-emotional skills in order to find comfort and confidence within the educational environment. It is a program goal to help students develop coping strategies to address social-emotional needs, and apply those skills in the broader school setting in order to meet academic success. The PREP classroom includes in-classroom sensory regulation spaces to allow students to use coping strategies during heightened emotional experiences while remaining in the learning environment.

All PREP courses are aligned to state standards and District 88 curriculum. Curriculum is modified to meet the needs of each learner. Students have the option to float out to other courses with the support of PREP staff in order to take classes in areas of interest and/or to meet graduation requirements. Various therapies are included in the program including social workgroup support, art therapy, music therapy, meditation and mindfulness, and pet therapy.

Behavior Resource Center (BRC) Addison Trail only: The BRC is a highly structured self-contained environment for students that require intensive academic and behavioral support that offers skill development in educational, social-emotional and transitional skills. The courses offered are dependent upon the credit needs of the students in the program within a given school year.

A primary focus of the program is helping each student accept responsibility for his/her own academic progress and behavioral choices in the school setting. This will be accomplished in the context of a highly structured classroom environment which offers clear expectations, consistency and a supportive therapeutic component. Each student's choices will be reinforced through direct and immediate feedback throughout the day, as well as group and or individual counseling as needed. By fostering a supportive relationship with each student, we will work together with that student to achieve the following goals: 1) development of appropriate problem-solving skills, 2) development of appropriate interpersonal skills, 3) increased school success, 4) development of a vocational plan, including goals to be accomplished in the high school program, as well as long-range goals for work and/or education and ultimately, 5) high school graduation.

All BRC courses are aligned to state standards and District 88 curriculum. Curriculum is modified to meet the needs of each learner. Various supports are included in the program including social work support, monthly visits from a Comfort Dog, and field trips organized through an outside agency called Chicago Voyagers.

Link Program: The Link program is designed to provide tiered life skills and functional-academic instruction. The focus of the program is to provide students with skills necessary for independent living and competitive employment in the post-secondary environment. Students in the program benefit from vocational training/support integrated into their school day, as well as community outings to develop and practice independent living and self-determination skills, with support, in the real world environment.

Courses offered in the Link Program:

- Functional Academics
 - English
 - Math 1
 - Math 2
- Self-Reliance
- Pre-Occupational Skills/Vocational Skills

Students enrolled in the Link Program will participate in a variety of transition/life experiences that include but are not limited to:

- Cooking Experiences: menu planning, grocery shopping, following recipes, kitchen safety
- Community-Based Instruction: budgeting, communicating, shopping, volunteer opportunities, community safety, money skills
- Self-Determination Activities: goal setting, self-advocacy, self-awareness, problem-solving
- Vocational Experiences: in-school vocational training and community vocational training
- Social Instruction: teamwork, communicating, conflict resolution, relationships
- Daily Living Skill Instruction: housekeeping, hygiene, home safety, healthy choices

Developmental Learning Program (DLP) District Program: The Developmental Learning Program (DLP) is a highly individualized program designed to meet the needs of students with multiple disabilities (Intellectual Disabilities, Autism, etc.). The purpose of the program is to support the development of functional academic skills as well as everyday life skills such as: money management, social and emotional skills, community-based skills, vocational skills, communication skills, self-care, self-advocacy, and functional life skills (cooking, cleaning, hygiene, etc.)

Placement into the Developmental Learning Program is an IEP team decision based on specific student needs. The team determines the placement that best meets the needs of an individual student. The decision is made after a thorough review of the IEP components which may include present levels of performance, goals/objectives, accommodations, modifications, supplementary aids and services, state and district assessments, behavior intervention plans, teacher and parental input, and results from any previous evaluations. This program is housed at Willowbrook but students from both Addison Trail and Willowbrook are eligible to be in this program based on the decision made at the student's IEP meeting.

The students in the Developmental Learning Program receive instruction from various related services including speech, occupational therapy, social work, music therapy, and art therapy. Related services are conducted in small group, whole group, or individual sessions. The amount of time that each student receives instruction is dependent on their IEP. Students enrolled in the Developmental Learning Program go out into the community on a weekly basis to practice and apply skills which are being taught in the classroom setting.

Off-Campus Placement: When the needs of students extend beyond the resources and programs available within the district, the IEP team may consider placement in an off-campus setting. District 88 partners with more than 50 different public and private facilities to ensure that the unique needs of District 88 students can be met.

Extended School Year (ESY): Extended school year is a program for students who may show a regression of skills without schooling during the summer months. Eligibility for this program will be decided upon at your student's Annual Review IEP meeting.

District 88 LIFE Transition Program: The LIFE program is located at our District 88 Office building. This program is designed for students ages 18-22 who need additional assistance preparing for their adult lives. The focus of this program is vocational and life skills.

For more specifics, please contact the Transition Department Chair, Devon Harris (dharris@dupage88.net, 630-458-4512).

Related Services: Related services are provided on an as-needed basis determined at your student's IEP meeting. They are services to supplement their academic curriculum that supports their overall success in school.

- Social Work (group or individual)
- Speech-Language Therapy
- Occupational Therapy

- Physical Therapy
- Assistive Technology
- Transportation

Learning Services Department and Legal Compliance

In compliance with IDEA and the "Rules and Regulations to Govern the Administration and Operation of Special Education," mandated by the Illinois State Board of Education, DuPage High School District 88 offers special education classes and services designed to meet the unique needs of students with the following areas of eligibility:

- Visual Impairment
- Specific Learning Disability
- Hearing Impairment
- Emotional Disability
- Physical Impairment
- Intellectual Disability
- Speech/language impairment
- Autism
- Other Health impairment

As required by law, program placement is determined by the IEP team based on each student's individual needs. Students can be placed full-time or part-time into any of the above programs without barriers to enrollment.

Appropriate District 88 staff participates on the Behavior Interventions Committee. This committee develops policies and procedures for students with disabilities who require behavioral interventions. This is in accordance with P.L. 89-191 and the guidelines set forth by the Illinois State Board of Education.

Each year a copy of the procedural safeguards and rights for students with disabilities are furnished to all parents and/or guardians of students with disabilities receiving special education and related services. Additionally, all students and parents are notified concerning the District 88 policy on "Behavioral Interventions for Students with Disabilities."

Parents or students interested in knowing about the programs and specific classes available in District 88 beyond what is provided here should contact the Learning Services Department Head.

Important notice

Students with disabilities may receive related services as part of their individual education programs (IEPs). DuPage High School District 88 will maintain related service logs that record the type and number of minutes of the related service(s) administered to such students. Copies of any related service logs will be available to parents/guardians at their child's annual review IEP meeting. Parents/guardians of students with disabilities may also request copies of their child's related service logs at any time.

Art

AR55235

Advanced Animation

Students who are interested in going into the growing field of animation need to have a block of studio time to produce animations to be used for scholarship opportunities and admission into art schools. Advanced Animation allows students to have time to work on an in-depth semester long project. In addition to working in a more independent manner, students will learn new software that allows them to add special effects and sound layers to their animations. Past student films created during this class have been featured in The Ottawa Animation Festival in Canada and Chicago Youth Film Festival

Semesters: 1

Building: ATHS/WBHS

State Course Number: 05168A000

Dual Credit: N/A

Certifications:

Material Requirements:

Pre-Requisite: Animation 1 / Animation 2 or instructor's permission.

Alternate Course(s) - If Applicable

AR65235 Advanced Animation Honors

Dual Credit: N/A

AR55115

Animation & Cartoon Drawing 1

This course will introduce students to basic drawing techniques in the field of cartooning and animation. Single-panel cartoons, editorial cartoons, caricatures, original characters, comic strips, comic books/graphic novels will be explored with an emphasis on creativity, composition, and craft. A drawn animation with storyboards will be filmed and edited using the computer. 3-dimensional claymation and cut-paper animation will be explored. Career pathways, along with significant cartoons and animations from the past and present, will be studied.

Semesters: 1

AR44253**AP Studio Art**

The Advanced Placement Studio offers a choice of AP Drawing, AP 2-D Design, and AP 3-D Design. These classes are intended for independent art students who wish to develop individual skills, style, and technique along with a portfolio of work. This course is meant to provide students with an experience equivalent to a college level foundations class. Students will work on self-directed as well as teacher-directed assignments and will learn how to shoot professional quality photographs of their work.

Material Requirements:

Pre-Requisite: Graphic Design, Drawing/Painting, or Cartooning/Animation are recommended.

Alternate Course(s) - If Applicable

AR44243**AP Studio Art 3D Design**

This is an introductory college-level three dimensional art course where students will investigate the materials, processes, and ideas that artists and designers use. Students will communicate their ideas through works of art and design and explore a sustained investigation on an artistic theme through practicing, experimenting, and revising their artwork as they compile a portfolio throughout the year that showcases their investigation, the process, and the refined artwork. 3-D art areas that may be explored include sculpture, ceramics, jewelry, metalwork, installation, assemblage, mixed media, fiber arts, and architectural models.

Semesters: 2

State Course Number: 05175A000

Certifications:

Material Requirements:

Pre-Requisite: Ceramics and/or Sculpture/Jewelry are recommended.

Building: ATHS/WBHS

Dual Credit: N/A

Alternate Course(s) - If Applicable

AR44283**AP Studio Art Drawing**

This is an introductory college-level drawing and painting course where students will investigate the materials, processes, and ideas that artists and designers use. Students will communicate their ideas through works of art and design and explore a sustained investigation on an artistic theme through practicing, experimenting, and revising their artwork as they compile a portfolio throughout the year that showcases their investigation, the process, and the refined artwork. Drawing (analog and digital, painting, printmaking, and mixed media can be explored in this course.

Semesters: 2

State Course Number: 05172A000

Certifications:

Material Requirements:

Pre-Requisite: Drawing/Painting is highly recommended.

Building: ATHS/WBHS

Dual Credit: N/A

Alternate Course(s) - If Applicable

AR66153**Artistic Cinematography**

This course is designed for students to explore the art of filmmaking and cinematography. Students will explore the three phases of filmmaking (pre-production, production, and post-production), and they will learn about various forms of short film, camera techniques and compositions, directing, and editing. Influential filmmakers of the past and present will be showcased, and there will be exciting opportunities for students to display their artwork for our school community.

Semesters: 2

State Course Number: 05168A000

Certifications:

Material Requirements:

Pre-Requisite:

Building: ATHS/WBHS

Dual Credit: N/A

Alternate Course(s) - If Applicable

AR66145**Artistic Photography Honors**

This is a course for students who want to visually express themselves through a combination of photographic and artistic techniques. This course is open to students who have no experience in photography or students who have taken a photography course and want to take their skills to the next level. Students will learn basic photo composition, black and white darkroom techniques and digital photography. Students will investigate the use of photography for the communication of ideas through an understanding of the elements of art and principles of design using Adobe Photoshop to edit, process, and print high quality, professional photographs. This course will also investigate mixed media techniques using photographic imagery with a mixture of traditional art media and techniques compiled in a portfolio of their work.

Semesters: 1

State Course Number: 05167A000

Certifications:

Material Requirements:

Pre-Requisite:

Building: WBHS

Dual Credit: N/A

Alternate Course(s) - If Applicable**AR56045****Ceramics 1**

This is a studio art course in which students create original artwork from a variety of clay working methods. Basic hand building (coil, pinch, and slab), basic potter's wheel-throwing, and glazing will be explored with an emphasis on creativity, composition, and craft. Significant ceramic art from the past and present will be studied.

Semesters: 1

State Course Number: 05159A000

Certifications:

Material Requirements:

Pre-Requisite: Introduction to 2-D or 3-D Art

Building: ATHS/WBHS

Dual Credit: N/A

Alternate Course(s) - If Applicable

AR56145 Ceramics 1 Honors

Dual Credit: N/A

AR56065**Ceramics 2**

This is an advanced studio art course in which students create original artwork from a variety of clay working methods. Advanced and large-scale hand building (coil, pinch, slab), advanced and large-scale potter's wheel-throwing, and a variety of surface and glazing techniques will be explored with an emphasis on creativity, composition, and craft. Students will learn and participate in the kiln loading and firing process. Significant ceramic art from the past and present will be studied. Recommended for the student who was successful in Ceramics 1.

Semesters: 1

State Course Number: 05159A000

English

EN12013**English 9**

These courses combine the study of language and literature, including the short story, the novel, drama, the essay, and the narrative and lyrical poem, with a writing focus. These courses integrate research and writing skills with the study of vocabulary, grammar and literary classics. Special emphasis is given to basic language review, effective sentence writing, and paragraph development. Honors placement is made by the department and is based on teacher recommendation, placement scores, and prior grades. The final grade of the honors course is weighted. Note: Students enrolled in English 9 Honors will participate in a summer reading program.

This courses satisfies the graduation "writing intensive" requirement.

EN32083AS**American Studies English 11**

This course is open to all juniors and will satisfy the requirements for English 11. Two periods count for American history and English 11 graduation requirements. An English teacher and a history teacher cooperate to develop important themes in American culture; students learn connections between our country's literature and its history. In addition to history and literature, American Studies explores other aspects of our culture such as art, music, and architecture. Additional resources outside the traditional classroom, supplemental speakers, and field trips are also used to enrich the American Studies curriculum. The classes frequently cooperate on common projects designed to help develop reading, writing and thinking skills. American Studies meets for two consecutive periods, and two credits in English and two credits in American History are earned for the year's study. An extensive research project is required.

This course satisfies the graduation “writing intensive” requirement.

IT66093CTDB**Automotive Technology 5**

This course consists of an in-depth study of the vehicle emission system and hybrid vehicles. Students will spend time working on practicing diagnosis of vehicle engine performance and emission failures along with electrical diagnosis. Most labs will be completed on live vehicles that are currently being driven on the road. Customer service and customer interaction are also covered and put into practice during this course. Students will be required to diagnose, quote the repair to the customer and then complete the repair.

(2 Periods per day at AT/WB) DOUBLE BLOCK

Semesters: 2

Building: ATHS/WBHS

State Course Number: 20104A002

Dual Credit: N/A

Certifications: ASE: Brakes, ASE: Electrical & Electronics, ASE: Engine Performance, ASE: Engine Repair, ASE: HVAC, ASE: Maintenance & Light Repair, ASE: Suspension and Steering, Safety & Environment, SP2 automotive service safety

Material Requirements: Safety Glasses

Pre-Requisite: Automotive Technology 1, 2, 3 and 4

Alternate Course(s) - If Applicable

IT66103CTDB Automotive Technology 5 Honors : (2 Periods per day at AT/WB) DOUBLE BLOCK

Dual Credit: N/A

IT66113

Automotive Technology 6

This is an independent study course for students who have completed Automotive Technology 5. Automotive 6 will work on miscellaneous tasks not covered in the other automotive course and many of the diagnostic tasks and Hybrid/Electric vehicle tasks. Diagnostic tasks need to be done as many times as possible. Every vehicle is slightly different and the procedure to diagnose that vehicle is also different. The more vehicles the students get to diagnose, the better the technician they will be. In addition the students will be assigned a “supervisor” role of the Auto 3 students on some days. Auto 6 typically is placed at the same time as the Auto 3 course. The auto 6 students will be assigned to be a shop foreman or service advisor. This is to give them some experience in shop management and dealing with employees.

IT25045

Automotive Upkeep

Do you plan on owning a car? This course is designed to introduce students to the basic operation and maintenance of the automobile. Topics covered will be beneficial to ALL current and future car owners, both male and female, and will provide students with the skills necessary for owning and maintaining a car. This course will include classroom demonstrations and lab activities including oil changes, under the hood inspections, under the car inspections, changing and rotating tires, replacement of essential maintenance parts on an automobile, and how to properly care for your vehicle. This is the first step to owning a vehicle.

Semesters: 1

Building: WBHS

State Course Number: 20106A001

Certifications: WBHS

Material Requirements: Safety glasses and coveralls required

Pre-Requisite:

Alternate Course(s) - If Applicable

IT65035**Building Trades 1**

This course is designed for students interested in completing some of their own home maintenance and repair work and for those who may be interested in learning about a career in the building trades. Students learn the basic information and techniques necessary to use the major tools and various building materials required for routine repair and maintenance of a residential structure and its systems, including exterior and interior walls, roofs, windows, plumbing, masonry, and insulation. Students will work independently, in a large group, and/or in pairs while going through individual units of study throughout this course.

Semesters: 1
State Course Number: 17001A001
Certifications: SP2 Construction
Material Requirements: Safety Glasses
Pre-Requisite:

Building: ATHS/WBHS
Dual Credit: N/A

Alternate Course(s) - If Applicable

IT65045**Building Trades 2**

This course is a continuation of Building Trades 1 (formerly Home Repair and Maintenance). Students will advance their skills in several areas of building trades, including blueprint reading & implementation, floor framing, concrete & masonry work, roof framing, and steel construction. Students will apply knowledge and skills learned in the previous course and build upon those as well as learn new higher level skills to accomplish designated projects. Students will also have the opportunity to earn OSHA 10 Certification. Students will work independently and in groups throughout the course.

Semesters: 1
State Course Number: 17001A001
Certifications: Both
Material Requirements: Safety Glasses
Pre-Requisite: Building Trades 1 or Home Repair & Maintenance

Building: ATHS/WBHS

IT55085**Computer Aided Drafting 1 Mechanical CAD 1**

In this course the student will learn to use the computer as a drafting and design tool. The basics of machine drawing and design are explored as well as an introduction and utilization of AutoCAD software. Another purpose of this course is to present to the student different types and procedures for drawing pictorial illustrations. Some of the units covered will include isometric drawings, perspective, exploded views, and different types of rendering and 3-D Modeling. AutoCAD is one of the most commonly used drafting software packages in the world today and mastery of its skills can prove to be very valuable in a variety of career fields including engineering, construction, and manufacturing.

Dual credit option is available through the College of DuPage.

IT55215**Computer Repair 1**

This course is designed to equip beginner and semi-experienced students with entry-level computer technician proficiencies. The course follows CompTIA A+ Certification objectives for computer hardware. Students will become proficient with computer hardware components including the motherboard, processor, memory, drives, power supplies, and other devices. Classroom activities including demonstrations, videos, and lab work to help master the theory and operation of computer hardware. This course follows industry-recognized curriculum and is strongly recommended for students who have an interest in pursuing Computer Servicing and Technology as a career or as a computer enthusiast.

Dual Credit option is available through the College of DuPage at WBHS.

IT65093CTDB**CTE Youth Apprenticeship**

This course is geared towards juniors and seniors who are choosing career paths in career and technical education fields, including: engineering, precision manufacturing, , cybersecurity, computer programming, computer hardware and software design, and others in the CTE fields of business, hospitality, and others. This is a double block course that includes a release period for students to attend a paid apprenticeship at a local company. Students will learn about different aspects of the manufacturing process and have the opportunity to earn career certifications, complete resume and interview skills during the classroom portion. Prior CTE coursework including OFTI 1250 and BSNS 1111 highly recommended. Industry certification opportunities available.

Digital Electronics PLTW

Students learn important aspects of development and implementation of electronic components. They apply math, science, and standard engineering practices to design electrical circuits using technology such as robots, sensors and motor controls. Students are introduced to the process of combinational and sequential logic design, engineering standards and technical documentation. They are also exposed to programming integrated circuit kits and microcontrollers.

University credit is available. Grades: 10, 11, and 12

IT55035

Digital Imaging

Students will explore the many applications of digital media. The focus includes processing, comprehension, storage, printing, and professional display of images. Time will be dedicated to edit and utilize still shots as well as digital video. Students will learn how to manipulate images creatively from various genres including, but not limited to photo editing, illustrations, and typography. The Adobe Create Suite with emphasis in Adobe Photoshop will be used in production of projects.

IT15113

Intro to Engineering Design PLTW

Introduction to Engineering Design (IED) is a high school level course for students who are interested in design and engineering. The major focus of the IED course is to expose students to design process, research and analysis, teamwork, communication methods, global and human impacts, engineering standards, and technical documentation. IED gives students the opportunity to develop skills and understanding of course concepts through activity-project, and problem-based (APPB) learning. Students will employ engineering and scientific concepts in the solution of engineering design problems. In addition, students use Auto Desk INVENTOR a 3D solid modeling design software package to help them design solutions to solve proposed problems. Students will develop problem-solving skills and apply their knowledge of research and design to create solutions to various challenges that increase in difficulty throughout the course.

Photography 1 CTE

This is an introductory course in which students will learn basic photographic processes— including black and white film and digital photography. This course covers the technical areas of photography, but stresses the proper practices and techniques as they apply to taking and printing of good pictures. Areas to be covered include: history of photography, camera types, light, lenses, camera handling, film, composition, filters and color. The program focuses on camera operation, film processing, printmaking and presentation. Students will also investigate the use of photography for the communication of ideas through an understanding of the elements of art and principles of design as well as Adobe Photoshop to edit, process, and print high quality, professional photographs.

Dual credit option is available through the College of DuPage.

Photography 2

This is an advanced level course that will expand the student's knowledge and skill with the photographic medium, as well as utilizing black and white and digital photography techniques. Students will investigate fine printmaking techniques and the use of different films and papers as well as working with studio and commercial lighting and proper techniques for flash photography and use of Advanced Adobe Photoshop. Students will employ a more extensive manipulation of images and alternative process techniques. Students will learn processes and do assignments similar to those demanded of a professional photographer.

Dual credit option is available through the College of DuPage.

Prin Of Engineering CTE PLTW

Principles of Engineering (POE) exposes students to major concepts they will encounter in a post-secondary engineering course of study. Topics include mechanisms, energy, statics, materials, and kinematics. Students develop problem-solving skills and apply their knowledge of research and design to create solutions to various challenges, document their work and communicate solutions, along with utilization of a 3D printer and APPB learning. This course will lead to paths of other specializations, including aerospace, biotechnical, civil engineering and architecture, computer integrated manufacturing, digital electronics, and engineering design and development.

IT55285

Screen Printing

This is one of the introductory courses in Graphic Communications. It includes study and projects in the areas of layout and design, computer assisted design, desktop publishing, scanning, and an emphasis in screen-printing. Screen-printing is more than T-shirts and reflects a growing employment market. The projects will survey various stencil preparation methods. The projects are designed by the students and printed on a variety of materials. The student will learn the proper techniques and methods for printing on T-shirts, mirrors, posters and paper in single and multiple colors.

Screen Printing and Production 2

This course is a continuation of Screen Printing with a greater emphasis on equipment operation, long run production, and the creation of professional screen print designs. Varying levels of specialization are undertaken with emphasis upon the area of the student's choice. Activities and projects will allow students to develop the skills necessary to seek employment in the field of Graphic Communications. After a general level of competency is achieved, specific advanced skill development can be directed into the following areas: desktop publishing, design and screen-printing. Basic math computation skills and the ability to read a ruler are recommended.

Technology Survey 1

As the name implies this course allows a student to explore a variety of technical skill areas that they may know little about, and it provides a wide range of student activities related to all areas of technology and engineering education in the areas of: Woodworking, Technical Drawing & CAD, STEM (Science Technology Engineering and Mathematics), Automotive Service and Maintenance, and Small Engines. This broad technical background will aid in making future education and career choices. It is primarily a hands-on lab activity class with discussions to reinforce student learning. Students will be exposed to various career possibilities through discussions in class and lab experiences.

Woods 1

This course will introduce students to basic woodworking skills. Students will learn how to properly operate and maintain woodworking tools and machines, learn to identify different types of wood, and the characteristics of various types of woods while completing basic projects. This is primarily a hands-on lab course where students learn through demonstration and project-based learning activities. Students will have the opportunity to earn certification on specific machines through the Woodworkers Career Alliance. Through the completion of projects and classroom activities, students will learn and improve skills in safety, organization, basic math, project planning, and reading. These skills establish a foundation for advanced woods, careers in the building trades, and/or an introduction to a rewarding hobby. Safety glasses are required. Industry certification opportunity available.

MA55333**AP Principles of Computer Science**

Description: AP Computer Science Principles is an introductory college-level computing course that introduces students to the breadth of the field of computer science. Students learn to design and evaluate solutions and to apply computer science to solve problems through the development of algorithms and programs. They incorporate abstraction into programs and use data to discover new knowledge. Students also explain how computing innovations and computing systems—including the internet—work, explore their potential impacts, and contribute to a computing culture that is collaborative and ethical.

Dual Credit: N/A

MA55243**Cybersecurity PLTW**

This course exposes high school students to the ever growing and far reaching field of cybersecurity through problem-based learning. Students engage in algorithmic thinking, computational thinking and critical thinking. Students will also explore the many educational and career paths available in the field of cybersecurity and information security.

Potential college credit is available through PLTW university programs.

MA55353**Integrated Algebra**

Integrated Algebra focuses on the foundational algebraic knowledge and skills that matter most for college and career readiness. This course is designed to deepen students' understanding of linear relationships by emphasizing patterns of change, multiple representations of functions and equations, modeling real-world scenarios with functions, and methods for finding and representing solutions of equations and inequalities. This course prepares students to take Algebra-Geometry the following year.

MA55233**Principles of Computer Science**

This is an introductory computing course that introduces students to the field of computer science. Students learn to design and evaluate solutions and to apply computer science to solve problems through the development of algorithms and programs. They incorporate abstraction into programs and use data to discover new knowledge. Students also explain how computing innovations and computing systems—including the internet—work, explore their potential impacts, and contribute to a computing culture that is collaborative and ethical.

Reading

RD55163**Reading 3 Intervention**

Freshmen through seniors reading at a Normal Curve Equivalent (NCE) level between 1 and 29, and/or not yet meeting PSAT requirements are assigned to Reading 3. Placement is based on standardized test scores, PSAT scores, and teacher recommendation. Each student will receive intensive individual interventions. Progress monitoring will be done on a regular basis, using various classroom measurements. Students must meet exit criteria to be withdrawn from the class.

Semesters: 2

RD15083**Reading EL 1**

This one-period course is designed for intensive reading instruction in English for students whose first language is not English and who are in the “entering” and “beginning” levels of English proficiency. The course emphasis is on acquiring the comprehension and vocabulary skills necessary to become proficient readers, writers and speakers of the English language. Students enrolled in this course are concurrently registered in English Learners I. Students enrolled in Reading EL I are eligible to receive tutoring in all content area classes at no cost to them. Exit criteria are based on standardized test scores, achievement of state standards, and teacher recommendation.

Semesters: 2

Building: ATHS/WBHS

Material Requirements:

Pre-Requisite:

Alternate Course(s) - If Applicable

RD25093**Reading EL 2**

This one-period course provides continued intensive reading instruction in English for students whose basic interpersonal language has developed to a level that allows them to begin reading independently in English, and who are in the “developing” level of English proficiency. The course emphasis is on acquiring the comprehension and vocabulary skills necessary to become proficient readers, writers and speakers of the English language. Students enrolled in this course are concurrently registered in English Learners II. Students enrolled in Reading EL II are eligible to receive tutoring in all content area classes at no cost to them.

SC32193**AP Environmental Science**

The goal of the AP Environmental Science course is to provide students with the scientific concepts and methodologies that are required for them to understand the interrelationships of the natural world. The course is a full-year course intended to be the equivalent of a one-semester introductory college level course in Environmental Science and prepares students to take the AP exam. The course is interdisciplinary; it stresses scientific concepts in geology, biology, chemistry, geography, environmental ethics, and economics. Topics include: global water resources, ecosystem diversity, energy flow, soil dynamics, weather and climate change, impacts of population growth, land use and conservation, alternative energy sources and pollution. This course will involve extensive laboratory experiences, possibly requiring time before or after school.

SC31053**Ornamental Horticulture**

The major aim of Ornamental Horticulture is to give the student practical experiences needed to enter ornamental horticulture occupations. These experiences take place outdoors, in the greenhouse, and in the home environment. Emphasis is placed on greenhouse crop production; landscape design, construction and management; turf grass management; floriculture and floral design. There is a minimum of traditional classroom activity as emphasis is centered on greenhouse and hands-on experience.

Dual Credit: N/A

Alternate Course(s) - If Applicable

SC31153**Greenhouse Operation & Mgt**

Advanced work in four areas of Horticultural Science will be emphasized namely propagation of plants (both asexually and sexually, plant nutrition and soils, bedding plant production, merchandising, and greenhouse management. Each student will select and complete a significant project in the area of his/her particular interest.

Semesters: 2

State Course Number: 18053A001

Certifications:

Material Requirements:

Pre-Requisite: Ornamental Horticulture

Building: ATHS

Dual Credit: N/A

Alternate Course(s) - If Applicable

SC55223**Comparative Zoology**

Live animals in the classroom provide students with an understanding of animal anatomy, nutrition, care and diseases. Humane laboratory experiments are conducted on small mammals, fish, birds, reptiles and amphibians. In addition, students are given information on career opportunities in the field of animals and are provided with realistic views of the requirements and responsibilities of these careers. Topics of study include zoonotic diseases, ecology, taxonomy, evolution, animal behavior, and current events.

Semesters: 2

Building: ATHS/WBHS

State Course Number: 03061A000

Dual Credit: N/A

Alternate Course(s) - If Applicable**SC32073****Chemistry**

Core Chemistry is an introductory course using discovery-based labs and modeling to explore various concepts in Chemistry. A special emphasis will be placed on developing critical thinking skills, scientific inquiry, and several scientific practices. These practices include developing and using models, planning and conducting investigations, analyzing and interpreting data, using mathematical and computational thinking, and constructing explanations; and to use these practices to demonstrate understanding of the core ideas of Chemistry. While most of the course focuses on conceptual learning, basic algebra skills are required.

AP Physics 1

Algebra-Based AP Physics 1 is the equivalent to a first-semester college course in algebra-based physics. The course covers Newtonian mechanics (including rotational dynamics and angular momentum); work, energy, and power; and mechanical waves and sound. It will also introduce electric circuits. Science practices are emphasized. The ability to develop and use physics knowledge by applying it to the practice of scientific inquiry and reasoning is at the heart of the new physics courses and exams. Scientific inquiry will be used to promote a more engaging and rigorous experience for AP Physics students. Inquiry-based investigations are emphasized. The amount of instructional time devoted to laboratory investigations is 25 percent. These investigations foster student engagement in the practice of science through experimenting, analyzing, making conjectures and arguments, and solving problems in a collaborative setting, where they direct and monitor their progress toward an academic goal.

SC44153

AP Physics C

The Advanced Placement calculus-based physics course is a one-year physics course designed to meet the objectives of a first-year college physics course especially appropriate for students planning to specialize or major in one of the many physical sciences or fields of engineering. The course will address the topics of Mechanics and Electricity & Magnetism, the first two semesters of college physics. Common units of study that address the content of Mechanics include: Kinematics; Newton's Laws of Motion; Work, Energy, and Power; Systems of Particles and Linear Momentum; Rotation; Oscillations; and Gravitation. Additional units that address the content of Electricity and Magnetism include: Electrostatics; Conductors, Capacitors, and Dielectrics; Electric Circuits; Magnetic Fields; and Electromagnetism. Students cultivate their understanding of physics through classroom study and open-ended activities as well as hands-on laboratory investigations as they explore larger concepts such as change, force interactions, fields, and conservation.

SC24143

Principles of Biomedical Science PLTW

This course provides an introduction to the biomedical sciences through exciting hands on projects and problems. Students investigate the human body systems and various health conditions including heart disease, diabetes, sickle-cell disease, hypercholesterolemia, and infectious diseases. They determine the factors that led to the death of a fictional person, and investigate lifestyle choices and medical treatments that might have prolonged the person's life. The activities and projects introduce students to human physiology, medicine, research processes and bioinformatics. Key biological concepts including homeostasis, metabolism, inheritance of traits, and defense against disease are embedded in the curriculum. Engineering principles including the design process, feedback loops, and the relationship of structure to function are also incorporated. This course is designed to provide an overview of all the courses in the Biomedical Sciences program and lay the scientific foundation for subsequent courses.

SC34073

Human Body Systems PLTW

Human Body Systems is an elective class in which students examine the interactions of body systems as they explore identity, communication, power, movement, protection, and homeostasis. Students design experiments, investigate the structures and function of the human body, and use data acquisition software to monitor body functions such as muscle movement, reflex and voluntary action, and respiration. Exploring science in action, students build organs and tissues on a skeletal manikin, work through interesting real world cases and often play the role of biomedical professionals to solve medical mysteries.

SC55283**Intro to Engineering Design PLTW**

Introduction to Engineering Design (IED) is a high school level course for students who are interested in design and engineering. The major focus of the IED course is to expose students to design process, research and analysis, teamwork, communication methods, global and human impacts, engineering standards, and technical documentation. IED gives students the opportunity to develop skills and understanding of course concepts through activity-project, and problem-based (APPB) learning. Students will employ engineering and scientific concepts in the solution of engineering design problems. In addition, students use Auto Desk INVENTOR a 3D solid modeling design software package to help them design solutions to solve proposed problems. Students will develop problem-solving skills and apply their knowledge of research and design to create solutions to various challenges that increase in difficulty throughout the course.

SC55165

Medical Careers A

Human Body Systems must have been taken previously or while enrolled in Medical Careers. Medical Careers is a one semester, two period course that is cosponsored by Addison Trail HS and GlenOaks Medical Facility. Through this course, students experience the duties performed by many medical professionals. Students spend four and half hours a week at GlenOaks and four hours a week at Addison Trail. Classroom activities include taking vital signs, learning and using medical terminology, exploring medical ethics and disease. When at the hospital, the students shadow medical professionals in various areas of the hospital exposing them to the variety of health professions while utilizing their skills learned in both the medical careers classroom and from anatomy & physiology. (SC55185 Medical Careers - Hospital A/SC55195 Medical Careers - Hospital B)

To be scheduled as a DOUBLE BLOCK with "Medical Careers B" or "Medical Careers B Hospital" in ALT Courses; Dual credit option is through the College of DuPage.

Social Studies

SS44275

AP Comparative Government & Politics

Students will develop conceptual tools necessary to understand some of the world's diverse political structures and practices. This high-weighted course will include the study of countries and their governments and general concepts used to interpret the relationships and institutions found in national and global politics. Six countries will be the emphasis of this course, which provide students a foundation for developing paradigms of different types of political systems. Study will be focused on topics such as political authority and power, and relationships between states and different political systems. This course prepares the student for the AP examination. A satisfactory score on the Advanced Placement test could result in students receiving college credit and/or advanced placement in college.

SS24093

AP European History

This challenging course provides an in-depth study of Western Civilization from the dawn of the Renaissance (1450) to the fall of communism (1989). In addition to political history, this course will also cover aspects of culture, including philosophy and art. This elective course has been designed to prepare students for the Advanced Placement exam in European History. A college level textbook will be used for the course, as well as supplementary materials. Students should expect to be assessed through objective tests, document-based essay questions, class discussions, library research, and simulations. A satisfactory score on the Advanced Placement test could result in students receiving college credit and/or advanced placement in college.

SS44255**AP Macroeconomics**

In this high weighted course, students will be introduced to elementary macroeconomic principles and methods of analysis. Topics in the course include: the national income, the monetary system, inflation, recession, national debt, international trade, and economic growth. Macroeconomic principles will be used to analyze selected social issues such as taxation, Federal spending, foreign trade, and stabilization policies. The class will track the performance of the economy as a whole. A satisfactory score on the Advanced Placement test could result in students receiving college credit and/or advanced placement in college.

SS44245**AP Microeconomics**

In this high-weighted course, students will be introduced to the principles of economics and their application to decision making, both as consumers and producers. Topics in microeconomics include: the market system, supply and demand, the determination of price and output levels, surpluses and shortages, and market structures such as monopoly, oligopoly, and perfect competition. Students will learn to apply basic economic principles to personal decision-making, as well as to analysis of the economy's operation. A satisfactory score on the Advanced Placement test could result in students receiving college credit and/or advanced placement in college.

SS44123**AP Psychology**

This high-weighted course covers all areas of psychology in depth. Students will learn the major core concepts and theories of psychology; they will learn to define key terms and to use these terms in their everyday vocabulary. They will also learn the basic skills of psychological research, devise simple research projects, and evaluate the general validity of research reports. Students will be able to develop critical thinking skills, build their reading, writing and discussion skills, learn about the ethical standards governing the work of psychologists, and to apply psychological concepts to their own lives. A satisfactory score on the Advanced Placement test could result in students receiving college credit and/or advanced placement in college.

SS44265**AP United States Government & Politics**

Students will develop an analytical perspective on government and politics in the United States. This high weighted course includes both the study of general concepts used to interpret U.S. politics and the analysis of many examples. Through this course the student will gain a familiarity with various institutions, groups, beliefs and ideals that constitute U.S. politics. This course will cover college level topics such as, the U.S. Constitution, American Political Parties, Civil Rights, Individual Liberties and the Development of Foreign and Domestic Policy. This course prepares the student for the AP examination. A satisfactory score on the Advanced Placement test could result in students receiving college credit and/or advanced placement in college.

SS55323**Equity and Justice in America**

Students in this course will explore the historical and current experiences of minorities in the U.S. The instructional approaches in the course will be both historical and sociological, in order to provide insight into experiences of minorities in America. The course will undertake a study of a variety of minority groups. These groups will include: African Americans, Latinos, Asians, and Native Americans, in addition to women, the LGBTQ community, and the disabled. This course will also examine the intersections between the experiences of these minority groups and common issues that have arisen for them within the United States. Topics of discussion include politics, economics, housing, education, justice systems, changing demographics and contributions. The satisfactory completion of the course will result in receiving college credit from Elmhurst University.

This course engages student interest in the social sciences by connecting contemporary "what" and "where" questions to the historical "why" questions. Students will engage in the systematic study of patterns and processes that have shaped the human understanding of, use of, and alteration of Earth's surfaces. It explores the location of countries and human institutions (ethnic groups, cities, and industries) and examines why and how they exist. Students will employ spatial concepts and landscape analysis to examine human social organization and its historical and environmental consequences.

SS35113**The World of Psychology**

All of us have wondered at times what makes people tick. How do we develop and mature? How do we cope with stress in our lives? What forms our personality? The methods and theories of psychology will be explored with plenty of opportunities for discussion. The course is especially beneficial for those who are either interested in a career in psychology or are simply interested in gaining a better understanding of their own behavior, and the behavior of others.

SS32073AS**United States History - American Studies**

This double-period American Studies course uses U.S. History as a framework for a one year chronological study of political, cultural and military events. Such topics as drama, poetry, music, art, novels and intellectual history are integrated. The wide variety of class activities is limited only by the creativity of students who enroll; cooperative strategies are frequently used in class. Students who choose this option will receive credit for both United States history and English.

SS32073AM**United States History: American Mosaic**

This course is thematically based United States history that will focus upon student-driven inquiry. Students will explore major themes and questions in search of a comprehensive understanding of the United States evolution from its colonial past to present standing as a global power. In addition to student-driven inquiry, topics to be explored will include: immigration, civil rights, conflict and war, economics and inequality, and the evolution of our democratic government. Students will be challenged to discuss and analyze current and historical events while developing skills in reading, writing, and critical thinking.

Tech Center of DuPage

TD55133**Adv. Cosmetology**

Learn and refine skills in cuts, color, perms, nail care, esthetics, and make-up. Develop professional-level techniques through practice and instructor demonstrations. Learn how aspects of chemistry, anatomy, and geometry are applied every day by cosmetology professionals. Use your skills through TCD's full-service salon, industry internships, or community projects (theatrical productions, fashion shows, community service events). It is possible to earn up to 46 hours of college credit through this program. After graduation, use that great head start to obtain an associate's degree with a cosmetology or business emphasis, adding even greater value to your state license.

TD57153 Manufacturing CNC & Machine Technology

Discover how 2D modeling software like Revit, AutoCAD (computer aided design), Inventor, or Adobe fuels creativity and innovation in fields as diverse as architecture, construction, manufacturing, civil engineering, biomedical technology and more. The precision engineering field can include precision controls, replication, and fabrication; optics and optical fabrication; nanotechnology; metrology (measurement); interferometry (electromagnetic wave technology); and materials processing. It sounds futuristic, because it is! If your passion is ultra-precision production, discover how CAD interfaces with CAM (computer aided manufacturing) software tools and robotic production systems. Use 3D parametric solid part modeling software and create prototypes with TCD's 3D printers. You will learn how to control sophisticated Computer Numerically Controlled (CNC) machines and how to program and operate CNC machining and turning centers.

Articulated credit is available with the College of DuPage.

TD55563**Medical Terminology & Healthcare Careers**

Cover extensive biomedical terminology as it relates to each body system and to healthcare careers and medical specialties. Classes are taught by a licensed registered nurse and guest speakers may include other healthcare professionals. You will learn and apply your knowledge through a combination of multimedia assignments, interactive Smartboard activities, authentic lab activities, word games and case studies. You will also have the opportunity to become CPR and First Aid certified. In addition to strengthening science and language arts skills through anatomy and medical terminology, you will explore select medical math topics and learn job-seeking skills. Increase your likelihood of success as you continue your healthcare education!

TD57063**Professional Cooking Baking and Service**

In your first year, begin with ServSafe® -- a short certification course in food safety for managers -- followed by measurement and kitchen skills common to a range of industry pathways. Explore those pathways in a three-week rotation through cooking, baking, and service careers and the rest of the year is your choice: Cooking or Baking Curriculum. In one year, you have the opportunity to earn certifications and dual credit (both high school and college credit). Second year students spend six weeks in C-B-S Boot Camp, working in small teams to design and develop a foodservice concept. Then for three weeks your team will run that concept (managing a crew of first year students) through TCD's Bistro, Deli, or Gateway Café service areas. The remainder of the year is Baking or Cooking, the reverse of your first year curriculum choice

Semesters: 2

State Course Number:

Certifications:

Material Requirements:

Pre-Requisite: Prerequisites or concurrent enrollment: Culinary I, Culinary II

Building: ATHS/WBHS

Dual Credit: N/A

Alternate Course(s) - If Applicable

TD57143**Robotics & Automation Tech**

If you are fascinated by today's ever-morphing electronic devices, imagine learning how they work – and better still, how they can be improved by YOU. Learn to install, customize, repair, and maintain today's cutting edge electronics technology. First, learn to speak and read the language of electronics: symbols, data sheets, safety measures, and diagrams. Then begin electronic fabrication: the art of soldering, using assembly tools, and system testing procedures. You will build, test, and troubleshoot electronic circuits, using a digital storage oscilloscope to convert, observe and record constantly varying signal voltages. Understand the fundamentals of transformers, capacitors, inductors, and DC circuits.

World Language

WL12013

French 1

This course develops a basic understanding of the language, stressing the listening and speaking skills. The acquisition of meaningful speech patterns is gained through oral presentation of dialogues and structure drills. Dialogues and drills will progressively lead the student from a form of directed conversation to more spontaneous conversation. Grammar and vocabulary are treated functionally. Vocabulary expansion is also stressed. Cultural materials are presented through the language itself, in music, in videos, on bulletin board displays, etc.

Alternate Course(s) - If Applicable

WL12143**Spanish 1**

This beginning course emphasizes listening, speaking, reading and writing through a variety of performance-based classroom activities. Basic vocabulary, grammar concepts and cultural perspectives are introduced in order to facilitate written and oral communication in the target language. Performance activities include written and oral dialogues, simple written paragraphs, and short oral presentations. Performances are based on practical life situations that relate to high school students. The Hispanic culture is presented through various classroom activities.

WL43173**Spanish 4 Honors**

This high-weighted, advanced course provides students with a comprehensive grammatical analysis, as well as a historical and cultural overview of the Spanish-speaking world. Current events and social/political issues are also used as a vehicle to expose students to authentic language and foster practical comprehension and self-expression. Listening, writing, speaking, and reading correctly at a higher proficiency level is the primary goal of this course, as it will prepare students for further advanced studies.

Dual credit option through the College of DuPage.

Certifications:

Material Requirements:

Pre-Requisite: Spanish 3H and/or teacher recommendation.

Alternate Course(s) - If Applicable

WL44183**AP Spanish Language & Culture**

(Either AP course may be selected after successful completion of Spanish 4H or Heritage Spanish Lang 2H) The AP Spanish Language course will help students improve their Interpersonal, Interpretive, and Presentational communication and the five goal areas outlined in the Standards for Foreign Language Learning in the 21st Century (Communication, Cultures, Connections, Comparisons and Communities). Students will develop advanced vocabulary and grammar skills, while gaining deep cultural knowledge of the Spanish-speaking world. The course is meant to be comparable to third year (fifth or sixth semester) college or university courses that focus on speaking and writing at an advanced level.

Pre-Requisite: Successful completion of advanced Spanish courses and/or teacher recommendation.

Alternate Course(s) - If Applicable

WL44193**AP Spanish Literature & Culture**

(Either AP course may be selected after successful completion of Spanish 4H or Heritage Spanish Lang 2H) The AP Spanish Literature and Culture course is designed to introduce students to the formal study of a representative body of texts from Peninsular Spanish, Latin American and U.S. Hispanic literature. The course provides opportunities for students to demonstrate their proficiency in Spanish across the three modes of communication (interpersonal, interpretive and presentational) and the five goal areas (communication, cultures, connections, comparisons and communities) outlined in the Standards for Foreign Language Learning in the 21st Century. Emphasis is placed on approaching the study of literature through global, historical and contemporary cultural contexts. A key objective of the course is to encourage students not only to understand and retell the content of the texts they read but also to relate that content to literary, historical, sociocultural and geopolitical contexts in Spanish.
